

Terminal Combatives and Justified Deadly Force

The reality is that crime is much more violent today than ever before. The criminals who perpetrate these crimes understand the reality of the force continuum and how “ramping up” means being the victim. We teach military grade, field tested combatives adapted to allow “ramping down” from assumption of deadly threat premises to suit the scenario and fulfill the obligations of today’s law enforcement professional.

Imminent Threat Defense Systems LLC concerns itself with that faction of criminal violence that puts the public or the officer in imminent threat. We know that the deployment of defensive or lethal weapons options may not be feasible given the distances at which most encounters occur. We teach a variety of courses specifically tailored to the needs of corrections officers and LEOs featuring proactive weapons retention, defeating edged weapons and winning close quarters terminal threat confrontations.

YOU HAVE NO WEAPON AND NO TIME TO THINK, WOULD YOU KNOW HOW TO DEFEAT THE THREAT BEFORE THIS HAPPENS?

COUNTERPOINT™

Defeating Edged Weapons

This is not a sparring or knife fighting course. The course components stress the required mindset and principles to effectively combat an edged weapon assault. Participants will understand the knife as a tool and how to rapidly defeat any attack using the knife against them. This is a purely functional, proactive survival seminar and not a philosophical discussion. It includes an introduction to the **C.R.A.S.H.™ SYSTEM** (Combat Reaction-Induction Assault Survival Hybrid)

The **C.R.A.S.H.™ SYSTEM** focuses on the ability of an officer to effectively shut down the ability of any attacker, regardless of size or intent, to effectively engage in a deadly force assault in areas of operation where the officer is prohibited from drawing and using his firearm or other defensive tool effectively.

6 Hours in length

Duty belt strongly suggested.

CO/LEO Officers Cost is \$125.00

Highlights of the course include:

1. **The Use of Force Continuum:** levels of resistance and their respective level of control. Concentration will be focused on terminal threat/justified deadly force scenarios where duty weapons are not a functional option.
2. **Understanding the physical impact and threats associated with an assailant deploying edged weapons to enable any necessary justification of your use of force and the components of a Deadly Force Assault.**
3. **Understanding attack probabilities when facing edged weapons.**
4. **Physiological and kinetic realities of edged weapon attacks and their weaknesses.**
5. **The “21 foot” myth and the reality of distance liability**
6. **Identifying personal limitations (physical/mental) that may be faced while under stress and how to overcome these limitations.**
7. **Use of your environment, positioning and the central principles to surviving an EWA**

Learn to avoid the two most common MISTAKES in defeating an edged weapon attack:

1. *FOCUSING ON THE KNIFE,*
2. *KEEPING DISTANCE*

We will show you why the common rules of keeping your distance and focusing on the tool being used against you actually stop you from defending yourself successfully.

Learn the secret to reaction-induction with spinal and somatic strikes, breaks and throws encompassing the reflexive hardwiring built into human physiology. Take the intent of the criminal out of the scenario and learn to control assailants using the **C.R.A.S.H.™ SYSTEM**. Terminal ballistic strikes and deadly force justified joint disruption are emphasized in this survival-oriented seminar.
